## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1-8, 21, drawn to character input device, classified in class 345, subclass 168.
  - II. Claims 9-20, 22-61 drawn to keyboard structure, classified in class 400, subclass 472.
  - III. Claims 62-73, drawn to joystick device, classified in class 345, subclass 161.
  - IV. Claims 74-75, drawn to touch sensor, classified in class 345, subclass 173.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as inputting character, invention II has separate utility such as controlling direction movement, invention III for cursor control and invention IV for user interactive device. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
